DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Hudson (5427502).

There is an aspirator("nozzle") at 50, an aspirator portal in shroud 20 (fig.5), a fan 16, an aspirator hose 32, and a shroud 10 having upper/lower sections. The cross-section of the shroud shows that it is of plastic. The hose is deemed to pass through a "midsection" of the shroud as interpreted by a line running through the diagonal of the shroud.

The mention of "conventional molding process" in claim 11 should be deleted because a process limitation has no weight in an apparatus claim (insofar as there are no properties that cannot be described in any other way), and the term "conventional" is vague.

Allowable Subject Matter

Claims 3 and 5-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
